

# IN4MATX 241: Ubiquitous Computing

**Week 10:**  
**The Future**  
**of Ubiquitous Computing**

Daniel Epstein

# Today's Class

- 5:00-5:10—announcements
- 5:10-6:40—discussion on all the readings
- 6:40-6:50—short break
- 6:50-7:50—poster critique

# Next week

- Final poster
  - Due Monday March 18
  - If you haven't yet, upload your draft to Canvas now!
- Poster session
  - During the final exam period (Wednesday March 20, 10:30am-12:30pm, DBH 5011)
  - Invite your friends! There will be snacks.
- Final report
  - Due Friday March 22

# The Future of Ubiquitous Computing

- Led by John & Aziz
- Goals for today:
  - Critique Abowd's argument that Ubicomp is dead as a research field
  - Discuss Abowd's theory that Collective Computing is the next wave
  - Unpack Dey et al.'s satirical message about the roles of ubiquitous technology and human capability
  - Others?

# Course Evaluation

- It's available... somewhere on EEE
- Please fill it out this week!
  - It helps me improve classes like this one
- If you have anything you'd rather say to me directly, don't hesitate to send me an email or schedule a time to chat

# Discussion

**It's been an honor  
to be able to teach you.**

**I look forward to seeing  
what you do next!**
