

# IN4MATX 241: Ubiquitous Computing

Week 8:  
Personal tracking

Daniel Epstein

# Project Feedback

- Left on Canvas
- Aimed to address blockers
- Grade aimed to signal how I thought your project was going

# Today's Class

- 5:00-5:10—announcements
- 5:10-6:30—discussion on all the readings
- 6:30-6:40—break
- 6:40-7:50—project presentations
  - 8 projects total
  - ~5 minutes presentation, ~3 minutes feedback

# Next week

- Discussion topic: privacy and security
  - Led by Daniel & Qiancheng
- End of class:
  - Project stand-up status updates
  - Office hours/opportunity for feedback

# Personal Tracking

- Led by Hee Jeong, Sina, & Qingyang
- Goals for today:
  - Articulate what practices the two models of personal informatics explain and what practices they do not
  - Consider how we should approach designing for different self-tracking practices
  - Examine what personal informatics challenges OmniTrack and iStuckWithIt address
  - Others?

# Discussion

# **Project presentations**
